Shortened running title:

Grandmothers' Knowledge and IYCF Practices

Key words:

Nepal, child nutrition, grandmothers, infant and young child feeding

Acknowledgements and support:

The authors would like to acknowledge various organizations within the *Suaahara* project, including the United States Agency for International Development (USAID), Save the Children, and Helen Keller International. We also thank Akriti Singh and Swetha Manohar for providing valuable feedback to this paper. We are particularly grateful to the thousands of households who participated in the *Suaahara* baseline study for their time and energy. Chandni Karmacharya would also like to thank to Laura Brye, Pooja Pandey and Dale Davis for facilitating the internship at HKI Nepal so that this study could be carried out and Bishnu Dulal for assisting with data analysis.

Financial support:

Data collection and work on this manuscript was supported by the *Suaahara*, funded by the United States Agency for International Development (USAID).

Conflict of interest:

HKI, a *Suaahara* implementing organization provided an unpaid internship opportunity for Chandni Karmacharya to carry out this analysis in Nepal and funded a separate research consultancy for Kenda Cunningham. However, none of this analysis assesses the impact of *Suaahara*.

Authors' contributions:

C.K., K.C., and S.K. designed research; C.K., J.C. and K.C. analyzed data; C.K., K.C., and S.K. wrote the paper. C.K. had primary responsibility for final content. All authors read and approved the final manuscript.
