*Distinguished Madam / Sir,*

*We would cordially like to invite you to agree to participate in the national survey "Sexual Lifestyles, Attitudes and Health". You have been selected into a random sample of 5400 inhabitants of Slovenia.*

*An interviewer will visit you shortly and explain to you more about the survey. She will have an interviewer identity card issued by the Institute of Public Health of the Republic of Slovenia and the Statistical Office of the Republic of Slovenia with her picture.*

*All the information you might provide would be strictly confidential. All questions are prepared so that they are easy to answer. Your answers to most intimate questions would be anonymous. These questions are in special booklets which you could complete by yourself and only give back to the interviewer in a sealed envelope, so that even the interviewer would not see your answers.*

*In Slovenia, we never conducted a survey that would provide reliable information about sexual lifestyles and attitudes relevant to the spread of AIDS and other sexually transmitted diseases. Health care workers and other professionals, who plan public health care and health promotion, feel for a long time that we need such information.*

*The survey is financed by the Ministry of Health, the Ministry of Science and Technology, UNAIDS, the Institute of Health Insurance of Slovenia, the City Council of Ljubljana, Merck Sharp & Dohme Idea Inc., Roche Diagnostics, Krka and several smaller donors. The participating institutions are the Institute of Public Health of the Republic of Slovenia, the Medical Faculty, the Institute of Public Health of Ljubljana, and the Statistical Office of the Republic of Slovenia.*

*For the success of the survey it is extremely important, that each invited individual contributes his/her own attitudes and experiences whatever they may be. Only so we can obtain reliable information for the whole Slovenian population. When a person is selected into a random sample, he/she can not be replaced with another one. Thus your co-operation is very valuable. We cordially ask you to welcome the interviewer that will visit you shortly. If you need any additional information please feel free to get in touch with the survey team.*

*Sincerely yours,*

## WHO IS CONDUCTING THE SURVEY?

There are numerous participating researchers. The principal investigator is Irena Klavs, MD, MSc, from the Institute of Public Health of the Republic of Slovenia. Collaborators are: Marta Grgič Vitek, MD, and Zdenka Kastelic, health technician, from the Institute of Public Health of the Republic of Slovenia, doc. Marjan Premik, MD, PhD, from the Institute of Social Medicine of the Medical Faculty, Marko Vudrag, MD, from the Institute of Public Health Ljubljana, Darja Keše, microbiologist, MSc, from the Institute of Microbiology and Immunology of the Medical faculty, Metka Zaletel, mathematician, Marta Arnež, mathematician, and Zdenka Blejec, interviewers co-ordinator, from the Statistical Office of Slovenia.

## WHO IS FUNDING THE SURVEY?

In addition to the participating institutions the survey is financed by the Ministry of Health, the Ministry of Science and Technology, The Governmental Office for Female Issues, the Institute of Health Insurance of Slovenia, the City Council of Ljubljana, UNAIDS, Merck Sharp & Dohme Idea Inc., Roche Diagnostics, Krka, d.d., the Institute for Transfusion of Slovenia, the Institute of Public Health Nova Gorica, The Slovenian Patent Agency, and Maximarket, d.d.

## ADDITIONAL INFORMATION?

If you need any additional information about the survey you can ask the interviewer, who will answer you as completely as possible. If you need any further general information please refer to Irena Klavs, MD, MSc at the Institute of Public Health of the Republic of Slovenia. With questions regarding the work of the interviewers please refer to Zdenka Blejec at the Statistical Office of Slovenia.

## WHY THE SURVEY?

In Slovenia, we have never conducted a survey, to obtain reliable information about sexual lifestyle, attitudes and health related to the spread of AIDS and other sexually transmitted diseases. Health care workers, other professionals, and general public, we all need such information. Without such information it is difficult to prevent the spread of AIDS and other sexually transmitted diseases.

Such information is also needed for appropriate planning of health care for women in reproductive age, family planning and health promotion.

Some research has already been conducted in smaller groups of people. However, health care workers and other professionals, who work in the field of public health, feel that in Slovenia we need a proper survey conducted among all people with different lifestyles.

If as a nation, we want to be better prepared to the problems in the future, we have to better understand our sexual lifestyles and attitudes and the way they change with time. Also in Slovenia, we can not avoid these questions. The World Health Organisation has co-ordinated similar surveys in many countries all over the world. Similar surveys have been conducted in almost all countries of the European Community. Thus, this survey will also enable international comparisons.

## HOW WAS YOUR ADDRESS OBTAINED?

For conducting such a survey we need a random sample of the population. Otherwise we risk that the results will be erroneous. In our case we selected 5400 addresses from the Central Population Registry of Slovenia at the Statistical office of Slovenia. Addresses are from all parts of Slovenia. To obtain reliable results none of the selected individuals can be replaced with another one. This means that each refusal to participate is an irreplaceable loss. If many people refuse to participate the obtained information will not be useful.

## HOW WILL YOU ANSWER?

Questions are prepared so that they are easy to answer. Most intimate questions are in special booklets, which you will answer anonymously and give back to the interviewer in a sealed envelope. Thus even the interviewer will not be able to see your answers.

## WHAT ARE YOUR RIGHTS?

The success of the survey depends on the voluntary participation of the majority of invited individuals. Nevertheless, every individual has the right to refuse to participate in the survey. Everyone can first decide to participate and then refuse to answer individual questions or even refuse to continue to answer anytime during the interview. We will respect these rights, however, we kindly ask you to consent to participate regardless of possible reluctance, as many have done before you. In other surveys majority of people participated and answered the questions with only slight or without embarrassment.

We will respect your right to the confidentiality of all information. Your answers to more intimate questions will be anonymous. Your name or address will not appear on the questionnaires or in publications of the results.

## WHO ARE THE INTERVIEWERS?

They are specially trained individuals to

- conduct interviews,
- record your answers properly,
- treat all provided information confidentially,
- listen to all sorts of experiences and opinions, and
- have an interviewer identity card provided by the Institute of Public Health of the Republic of Slovenia and the Statistical Office of Slovenia with their name, the surname and their photograph.

IF YOU HAVE RINGED 17 OR 18, ANONYMOUS SELF ADMINISTERED BOOKLETS ARE NOT TO BE GIVEN AND GO TO QUESTION 26. IN ALL OTHER INSTANCES INTRODUCE THE FIRST BOOKLET FOR SELF COMPLETION.

25. a) PREPARE: booklets (SVS 03 M/1, SVS 03 M/2, SVS 03 M/3, SVS 03 M/4), envelope, tape, pen, sheet of paper (for respondent's notes), and empty booklets (if respondent asks you for help).

CHOOSE AND CROSS OVER ONE NUMBER FROM THE LIST OF UNIQUE RANDOMLY SELECTED NUMBERS AND WRITE IT ON ALL FOUR BOOKLETS AND ON THE ENVELOPE.

b) INSTRUCTIONS FOR THE COMPLETION OF THE FIRST BOOKLET (SVS 03 M/1):

You will answer the questions in these booklets yourself, as they are very personal. Your answers will be anonymous. Even I will not see them. Your name will not appear on any of these booklets. It is very important that you answer these questions as accurately and completely as possible. You will not need to answer all the questions. Depending on your answers, you will follow instructions and skip most. When you finish, you will put these booklets in this envelope and seal it. (GIVE FIRST BOOKLET, ENVELOPE AND TAPE). You will answer by either ticking the box next to the answer that applies to you or by entering appropriate number in the empty field (SHOW ON THE FRONT PAGE). Here for example, (SHOW QUESTION 1, READ OUT) "When, if ever, was the last occasion you had a sexual intercourse with a woman?" If that happened "between 7 days and 4 weeks ago", you would tick this box (SHOW) and follow this arrow. In fact, you would follow this arrow, if you ticked any of these boxes. Then you would read the instructions in this box (SHOW, READ): "GO TO QUESTION 3 on page 6" and would continue to answer the question 3. on page 6 (SHOW). Alternatively, if that happened "longer than 5 years ago", you would tick this box (SHOW) and follow this arrow and continue answering the question b), and so on. It is very important that you do not read the questions that are not meant for you. It is necessary that you follow the arrows and instructions in the boxes and skip whole parts of booklets. If you read questions that were not meant for you, it would take too long, the questions would start repeating, they would seem illogical, and you could lose your way through the questionnaire. Usually there is only one possible answer to a question and you only tick one of the boxes. In such a case it is written "TICK ONE box" (SHOW - 1.a). Only sometimes it is possible that either one or several answers apply to you. For example, only this or this and this answer (SHOW - 1.c). In such a case, it says "Tick ALL boxes that apply to you" at the top of the column of boxes. You may find some things difficult to remember. Please take your time. Here is some paper, if you will want to make some notes (GIVE). I only have to add that certain terms such as vaginal, oral or anal intercourse are used (SHOW DEFINITIONS). The explanations are given here, so that everyone attaches the same meaning. Thus, please read these definitions first. CLOSE THE BOOKLET AND GIVE IT TO THE RESPONDENT. Please ask if something is not clear. I will use these empty booklets (SHOW) to explain, so that I will not see your answers. I will be doing something else while you are answering.

f) INSTRUCTIONS FOR THE COMPLETION OF THE SECOND BOOKLET (SVS 03 M/2):

Questions in this booklet are about the number of persons you have had sex with in different periods of your life: past 4 weeks, past 12 months, past 5 years and your entire life. If we look at the first question (READ, SHOW) "Altogether, in the past 4 weeks, with how many different women have you had sexual intercourse?" If that were none for you, you would tick this box and (READ, SHOW) "GO TO QUESTION 2 on page 3". If that was one woman, for example your steady partner or your wife, you would enter number 1 here and follow this arrow and answer the question b) and so on. It is very important that you remember ALL persons you have ever had sexual intercourse with, for all these different periods, whether it was just once or a few times. Also it is very important, that for all these 4 periods (4 weeks, 12 months, 5 years and lifetime) you always include your steady partner or wife, if you have one. For example here (TURN TO QUESTION 2 on page 3), if during the past 12 months you would have sex with two other women in addition to your steady partner or wife, you would answer this question (SHOW QUESTION 2. a), READ) "In the past 12 months, with how many different women have you had sexual intercourse?" by entering the number 3 here, thus with your steady partner or wife and two other women. Similarly for the period of past five years (TURN TO PAGE 5, SHOW, READ): if you had, in the "PAST 5 YEARS", apart from sex with your steady partner or wife sex with additional 3 women, you would answer question 3. a) by entering the number 4 here (SHOW), this is 1 steady partner or wife and 3 other women. I must also warn you about this question which is sometimes difficult to understand. (READ, SHOW): "In the past 5 years, with how many different women have you had sexual intercourse so that condom was ALWAYS used (at every intercourse)?" If we continue with the previous example, 1 steady partner and 3 additional in the past 5 years, if you never used condom with a steady partner, always used it with 1 of the other 3 (at every single intercourse), and with 2 only sometimes, the answer would be 1, as it was only with 1 partner from all these 4 in the past 5 years that you ALWAYS used condom. Thus, you would enter number 1 here (SHOW). CLOSE THE BOOKLET AND GIVE IT TO THE RESPONDENT. Please ask, if something is not clear.

j) INSTRUCTIONS FOR THE COMPLETION OF THE THIRD BOOKLET (SVS 03 M/3)

This booklet contains detailed questions (SHOW, READ) "about the individuals (women or men) you have had sex with in the PAST 5 YEARS". For example, if in the past 5 years you would not have any partner you would tick here (SHOW) and go to question 10 on page 51. Alternatively, if you had at least one partner in the past 5 years, you would tick here (SHOW), follow the arrow and answer the question b). (SHOW, READ) "Please do answer the question b)." as it is very important: "What of the following currently applies to you?" For example, if you (READ, SHOW) "not had a steady female partner currently", you would tick this box (SHOW) and go to question 4. on page 12. Alternatively, if you were (READ) "married",

you would tick this box (SHOW), follow this arrow and continue answering questions about your wife (TURN OVER THE PAGES TO PAGE 6, SHOWING THE QUESTIONS). When you would reach the end of these questions about this partner it would be very important to accurately answer the last question (READ) "In the PAST 5 YEARS have you had sexual intercourse with anyone else (a woman or a man), whether just once, a few times, a steady partner or a previous wife?", apart from the person you have just been answering about. If yes, you would tick "Yes" read the instruction in this box (SHOW) and go to question 6 on page 25. If no, you would tick this box "No" and go to question 10 on page 51. CLOSE THE BOOKLET AND GIVE IT TO THE RESPONDENT. Please ask, if something is not clear.

m) INSTRUCTIONS FOR THE COMPLETION OF THE FOURTH BOOKLET (SVS 03 M/4)

For the last booklet, I would just like to draw your attention to questions in this table. Here you will first answer this question (READ) "Have you ever been told by a doctor to have any of the following diseases?", first for the first row "Gonorrhoea". If that would be "no", you would tick this box "No", follow this arrow and respond to this same question (READ) "Have you ever been told by a doctor to have any of the following diseases?", for b) "Syphilis", and so on down the column (SHOW). For example, if it was yes for you for the "genital herpes", you would tick "Yes" here and then follow this arrow and answer all these questions (SHOW AND READ) "How many times was that in the last 12 months?" If that was never in the last 12 months you would enter "0" and go to the question "How many times was that in your whole life?" If that was twice, you would enter 2 here and then answer the question "Who treated you (last time, if several episodes)?" If this was a general practitioner, you would enter the number 3 here, and so on for genital herpes to the end of the row. Then you would go back to the question (READ) "Have you ever been told by a doctor to have any of the following diseases?" and continue for chlamydia and so on to the end of the table (SHOW). CLOSE THE BOOKLET AND GIVE IT TO THE RESPONDENT. Please ask, if something is not clear.

### **Introductory letter for urine specimen collection**

*Distinguished Madam / Sir,*

**INVITATION TO PARTICIPATE IN THE EXTENDED SURVEY  
"SEXUAL LIFESTYLES, ATTITUDES, AND HEALTH"  
WITH CONTRIBUTING AN URINE SPECIMEN**

*We would like to invite you cordially to agree to participate in the extended survey with contributing a small urine specimen. We want to test it for Chlamydia trachomatis infection that can be transmitted through sexual intercourse. Such infection, that may often be present without any symptoms, is very easy to cure. If it is not cured, it may, however, result in complications, in a female even in infertility. The infection can be transmitted to sexual partners.*

*Your participation will only require a few minutes of your time. We kindly ask you to catch the first void urine specimen, approximately 20 ml, into the small container that will be given to you by the interviewer.*

*In a case of a positive result, you will be notified no later than 4 weeks from today by Irena Klavs from the Institute of Public Health of the Republic of Slovenia and referred to treatment. The result of the test will be strictly confidential and can not be disclosed to anyone without your consent.*

*For any additional information please refer to Irena Klavs at the Institute of Public Health of the Republic of Slovenia, tel.: (061) 1323 245, ext.: 198.*

*This is a very important part of the survey. We want to assess the proportion of Slovenian people infected with Chlamydia trachomatis, so that we will be able to plan effective prevention and control programme for this disease. This is why your co-operation is so extremely valuable.*

*We sincerely hope that you will consent to participate.*

*Sincerely yours,*

*Irena Klavs, MD, MSc  
Principle investigator*
